Summary

AI Engineer focused on building production-grade LLM, agentic AI, and ML systems. Experienced in RAG, semantic retrieval, LLM evaluation, observability, AI APIs, and scalable Python backends.

Education

Pandit Deendayal Energy University (PDEU) M.Tech in Artificial Intelligence	Aug 2024 – May 2026
Parul University B.Tech in Computer Science and Engineering	Jul 2020 – May 2024

Experience

AI Development Intern – Schbang Solutions - Built scalable ML pipelines for automation and customer insight extraction. - Developed GenAI-driven content solutions using transformer-based models.	Jun 2025 – Sep 2025
AI/ML Intern – Bits Infotech - Developed recommendation systems and predictive ML pipelines for e-commerce data. - Built supervised learning workflows using Python and scikit-learn.	Jan 2024 – May 2024

Projects

Omnira – LLM Observability Platform - Built an LLM observability platform using Python, FastAPI, SQLAlchemy Async, Pydantic, and Hexagonal Architecture. - Implemented authenticated trace ingestion and querying with pagination, advanced filtering, search, repository abstractions, and project-level isolation.
ResearchPilot-MCP – Multi-Agent Research Assistant - Built a multi-agent research system using MCP, LangGraph, FastAPI, and ChromaDB for paper discovery, PDF analysis, semantic retrieval, and citation-aware reports. - Designed agent workflows for research planning, document analysis, retrieval, and automated report generation.
Benchlytics – LLM Evaluation & Inference Optimization - Built an LLM evaluation system for measuring model quality, latency, cost, failures, and inference performance. - Implemented asynchronous execution, dynamic batching, multi-tier caching, evaluation pipelines, and fallback strategies.
OpenSourcePilot – AI-Powered Open Source Assistant - Built an AI system that analyzes GitHub repositories and generates issue-specific contribution plans using LLMs and semantic code search. - Implemented ChromaDB retrieval, transformer embeddings, automated test generation, and pull-request drafting through GitHub APIs.

Technical Skills

Programming: Python, C++, SQL, JavaScript/TypeScript
AI & LLM: LLMs, Generative AI, RAG, Agentic AI, NLP, Transformers, Deep Learning, Model Evaluation, Explainable AI
Frameworks: PyTorch, TensorFlow, scikit-learn, Hugging Face, LangGraph, LangChain, MCP, FastAPI, Pydantic, SQLAlchemy
LLMOps & Retrieval: LLM Evaluation, Observability, Vector Search, Embeddings, Semantic Search, Async Processing, Caching
Infrastructure & Cloud: Docker, Git, CI/CD, REST APIs, ChromaDB, Pinecone, FAISS, AWS, Amazon Bedrock, Azure

Achievements

- Paper accepted at IEEE ICCCNT 2025 (IIT Indore).
- Top-performing model and paper accepted at SSBC 2025 (IJCB Osaka, Japan).
- Paper accepted at IEEE PREMI 2025 (NIT Delhi).
